

PeopleSoft Project Advisory Services

Emerging Solutions, a premier Certified Advantage Partner of Oracle, has extensive expertise in delivering best-in-class Enterprise Resource Planning solutions. Our D-3 Methodology has been utilized to complete hundreds of PeopleSoft projects successfully over the last 11 years. PeopleSoft's future solutions will continue to enable organizations to further increase the ROI by taking advantage of more robust technology and more efficient processes with analytic reporting capabilities. We make it our business to get ahead of this curve and can provide valuable advisory assistance to our client's to save them time and money down the road.

Emerging Solutions is pleased to present a solution offering that leverages our Financials Services and Supply Chain, Human Capital Management and Enterprise Technology expertise. These services are designed to compliment your PeopleSoft project whether you are completing the project with internal resources or another external provider.

Project Management and Project Audit Services

Emerging Solutions has realized much of our success by delivering quality PeopleSoft solutions. Our definition of a successful project is to deliver a quality solution that exceeds our client's expectations. A critical common denominator to delivering successful projects is strong Project Management. Our Project Managers, many PMI certified, bring our proven experience and methodologies to partner with your organization to deliver successful projects.

Our Project Audit Services allow our clients to leverage our experience and methodology without engaging an entire team. We partner with your project management organization, whether this group is comprised of internal or third party resources to provide a qualified subjective project audit. We will deliver our audit findings to the Executive leadership which could include risk mitigation plans, project plan review including scope, resourcing, timelines as well as strategic testing, training and communication planning assistance.

Quality Assurance Project Governance

Our QA Project Governance process is a pre-emptive progression that is embedded in our D-3 Methodology to ensure that the appropriate activities are performed to result in successful project delivery. We utilize

leading quality assurance software to track the key performance indicators of a successful project: scope, timeline, resource and budget tracking. Dashboard-driven scorecard assessments are provided to complement existing governance, risk and compliance processes. This also provides true 360° visibility into project and process performance. Our approach enables a proactive method to assess the project Quality in accordance with PMBOK principles.

Strategic Visioning Sessions

We will partner with Executive leaders to define short and long term goals for your PeopleSoft solution. We will facilitate planning sessions to deliver the optimal blueprint required to support the future PeopleSoft solution considering the people, process and technology impacts. Through this offering, your organization will also have access to our robust PeopleSoft knowledge network to validate the strategic vision and create a tangible tactical solution to implement. We provide recommendations on how to phase in the components of the future vision at a pace that is manageable for your organization yet still supports the key business drivers.

Business Intelligence for PeopleSoft Solutions

Business Intelligence for PeopleSoft solutions is becoming more readily available with the current and future releases of the product. Our team can complete an assessment of your organization's current analytic reporting requirements and source data systems to help to define your optimal solution.

Technical Architecture Review

PeopleSoft applications are complex, enterprise systems that require an optimized technical infrastructure to realize their full potential. We will partner with your team to complete an architecture review and provide hardware sizing recommendations to best meet your platform requirements. The recommendations will be driven by the systems footprint required to support today and tomorrow's solutions respectively. A Technical Architecture Review from our team of experts will ensure that your PeopleSoft architecture will support your changing business needs.

EMERGING SOLUTIONS

Emerging Solutions is an established professional services firm that helps global and mid-market firms maximize the value of business applications through leading technology.
